

## **BROADBAND INTERNET**

We offer free broadband internet in the apartment. Connection is via **LAN cable** (not WIFI). There is no password. We recommend you bring your own laptop and LAN cable if you wish to use this service. You can also purchase a cable from the receptionist at a cost of 150CZK (non-returnable). If you bring your own cable we recommend it is around 2-3 metres long.

### **LAN cable:**

### **Technical support:**

No problems have been reported so far with the connection (it is a shared 100Mb/s network installed in the whole building). However this service is provided free and we are not able to provide any technical assistance if for any reason it does not work during your visit.

### **Connection speed:**

We have conducted a speed test on our connection ([www.speedtest.net](http://www.speedtest.net)) and it shows an average speed of 7Mb/s. It streams youtube, video, TV etc without any problem. It is theoretically possible that the speed could be reduced if all connections in the building were being used simultaneously, however this is unlikely to happen very often.
